CHAIRMAN

ROOM 203, CITY HALL
TORONTO, CANADA

The thirteen municipalities of Metropolitan Toronto and its 1,750,000 citizens welcome all who are attending the Annual Meeting and Conference of the National Council on Family Relations.

As this metropolis has grown, quite rapidly, we have always endeavoured to maintain our community spirit and high standards by recognizing the important role of the family

Our visitors may be sure that they are in welcome surroundings and in the midst of people who are happy to offer every encouragement for the continued development of the motives which bring all of you here.

Yours sincerely,

WRA/t

Chairman
Metropolitan Toronto Council

PERSONAL ADJUSTMENT, MARRIAGE, AND FAMILY LIVING, 4th Edition

Landis - Landis

*personable,
lively,
up-to-the-minute
narrative*

An invigorating study of personality and personality development that stresses personal adjustment as a basis for successful living with oneself and others. Makes extensive use of recent research polls of high school students on questions of dating, courtship, marriage, and family living. New material on functions of the dating experience. Objective tone.

new book...*

THE SOCIAL CONTEXT OF MARRIAGE

J. Richard Udry

University of North Carolina

Clothbound, 550 Pages

... Ready in January 1966

The motivation and consequences of behavior in courtship and marriage have been dissected by scores of social scientists in countless useful and revealing studies. In **THE SOCIAL CONTEXT OF MARRIAGE**, Professor Udry skillfully clarifies recent behavioral research findings and presents fresh interpretations in an always instructive and occasionally provocative manner.

The author's approach is basically systematic and analytic, making liberal use of case histories to illustrate concepts and conclusions and to bridge the gap between general propositions and the realities of personal life.

Social-psychological aspects of masculine and feminine sexuality are explored with straightforward sophistication. Sexuality in general and heterosexuality in particular are viewed as socially developed behavior patterns with drives induced by social experience. The implications of this approach for social control and for individual attitudes toward sex are carefully probed and analyzed.

While the book addresses itself principally to middle-class American social patterns, cross-cultural material is frequently included to provide perspective for the student.

Presenting his material in a style that is consistently clear and easily grasped, Professor Udry makes it possible for the student who has not previously been exposed to courses in the social sciences to gain valuable insight into the complexities of heterosexual interaction in contemporary American society.

GOOD MOTHERING THROUGH BREAST FEEDING

The mother who nurses her baby establishes at an early date an intimacy with her child which makes further relationships with him easy and natural. Reliable statistics indicate that well over 90% of all modern mothers are physically able to nurse their babies; yet, only about one third of that number are actually successful.

Members of LA LECHE LEAGUE, having successfully nursed their own babies, are dedicated to helping other mothers who desire to breast feed, give, and enjoy giving happiness and security to their babies through breast feeding.

Over 300 local mothers' groups hold monthly meetings throughout the United States, Canada, and five foreign countries.

Comprehensive manual **THE WOMANLY ART OF BREASTFEEDING**
at **\$2.50** and **\$3.50** postpaid.

The Family

ITS STRUCTURE AND FUNCTIONS

Edited by Rose L. Coser

"More than just a 'distinguished collection'—although it certainly is that—it is one that brings together classic materials that are at the same time highly relevant to our contemporary interests."

—Professor F. William Howton
The City College, New York

"Readable, clear, timely and needed—this compendium of well-selected, readable articles by competent authorities on the family the world over and its ties to society meets the long-felt need for an up-to-date (1964) book on the family as an institution in society. It is well written and well organized by Professor Coser in its entirety."

—Dr. LeRoy L. Kohler
Fairleigh Dickinson University

A considerable achievement...

in a new Second Edition

Margaret A. Ribble's

THE RIGHTS OF INFANTS

Early Psychological Needs and Their Satisfaction

Here is the long-awaited and most welcome second edition of *THE RIGHTS OF INFANTS*. The book describes the emotional needs of infants and the part that "mothering" plays in normal development. Stressing the interrelationship between physical and mental growth, it outlines the various phases of development in early infancy and suggests the best procedures for enriching and stabilizing the emotional life of the infant.

The essential points of the first edition remain as valuable and important today as they were twenty years ago. To these, Dr. Ribble has added

increased emphasis in two basic areas: the role of the father in the infant's understanding of sex differentiation, and a greater understanding of early erotic impulses. Life histories are included to clarify the dynamics of early maturation problems, showing how these problems relate to emotional illness in later life.

"Required reading for doctors, nurses, social workers and others who are responsible for the care of infants, or for advising mothers regarding their care." —*Welfare*

SEXUAL LIFE AFTER SIXTY

By Isadore Rubin

Foreword by Alvin I. Goldfarb

Drawing on the most recent clinical and research data about sex functioning, needs, problems, and interests in the years after sixty, this work demolishes misconceptions that hinder a full, healthy, and creative expression of sexuality in the later years. "It is high time that someone put together between the covers of a book what we know about sexual life after sixty," writes Mary S. Calderone, executive director, Sex Information and Education Council of the United States. "This is a good book—objective, factual, honest, open."

2 outstanding books on family relations...

The Family: As Process and Institution

Clifford Kirkpatrick
Indiana University

This standard textbook employs a consistent theoretical framework to bring meaningful order to our knowledge about family life. It integrates theory with the most recent empirical research findings; uses abundant case material, interwoven throughout, to illustrate concepts and generalizations.

Family types and dilemmas are systematically analyzed as are social changes affecting the family. Among the specific problem areas covered are: sex behavior and early marriage, the family vs. the career, fertility control and its implications, the marriage-divorce-remarriage process, and the relation of the aged to the family and the state. *2nd Ed., 1963. 705 pp., illus.*
\$7.50

"... highly rewarding." —JOURNAL OF MARRIAGE AND THE FAMILY

"Anyone interested in any phase of the subject can turn to this book with confident expectation..." —FAMILY LIFE

Marriage Analysis FOUNDATIONS FOR SUCCESSFUL FAMILY LIFE

Harold T. Christensen
Purdue University

A comprehensive treatment of marriage, focusing on the interpersonal relationships of marriage partners during courtship, marriage, and parenthood. The book carefully examines democracy in family relations, sexual standards and adjustment, social and emotional maturity, interfaith marriage, child spacing in the family, and the broad social programs for strengthening marriage and family living.

Personality traits, behavior patterns, societal and cultural factors contributing to success or failure in married life are fully covered. This provides a sound basis for the development of workable and pragmatic attitudes to meet the challenge of marital obligations. Selected readings in each chapter exemplify the best sources on the subjects treated. Problems and projects further thinking, study, and research. *2nd Ed., 1958. 645 pp., illus.*
\$6.50

"The book abounds with good, solid, down-to-earth suggestions."
—CONTEMPORARY PSYCHOLOGY

"... well balanced, ... Readers will get information on almost any point that may interest them." —FAMILY LIFE

Books on Family Relations

MARRIAGE FOR MODERNS

Fifth Edition

By **HENRY A. BOWMAN**, University of Texas, 709 pages, \$7.95.

This leader in its field for 23 years is now completely revised and substantially expanded, including valuable reference material. Drawing material from sociology, psychology, biology, obstetrics, etc., the book is designed to improve the preparation for marriage of young people who are willing to apply themselves to serious study of marriage, so that they can make their own future marriage more meaningful.

POPULATION PROBLEMS

Fifth Edition

By **WARREN S. THOMPSON** and **DAVID LEWIS**, both of Miami University. McGraw-Hill Series in Sociology. 593 pages, \$8.95.

Although extensively revised, the book retains its basic purpose: to present the study of population in a way that will help the student to see the relationship between population facts and the political, social, and economic aspects of man's condition in today's world. As in previous editions, the coverage is comprehensive and well balanced. The emphasis remains on the significance of demographic facts, rather than on the acquiring of statistical techniques.

FAMILY PLANNING, STERILITY, AND POPULATION GROWTH

By **RONALD FREEDMAN**, The University of Michigan; **PASCAL K. WHELPTON**, Miami University; and **ARTHUR A. CAMPBELL**, Miami University. McGraw-Hill Series in Sociology. 515 pages, \$12.50.

Here is a description of how Americans plan the growth of their families, the success of their plans, and the consequences for the growth of the American population. The study is based on interviews with approximately 2,700 married women under 40 who constitute a representative national sample of the major social, religious and economic strata in our society.

MAN AND CIVILIZATION: The Family's Search for Survival

Edited by **SEYMOUR M. FARBER**, **PIERO MUS-TACCHI**, and **ROGER H. L. WILSON**, University of California, San Francisco Medical Center. 256 pages, \$6.50 (cloth), \$3.25 (paperback).

This fourth volume of the Man and Civilization symposia objectively evaluates current opinions and approaches to the modern American family from diverse points of view. Examines those factors which have led to the emergence of the American family in its present complex situation, and focuses upon the possible courses for its continued evolution.

Why do contraceptives work for some couples and not for others?

How does the conjugal role relationship, and the quality of the sexual relationship, affect the design of the family?

How do couples determine the number of children they want, and why?

What are the implications of American family design in terms of population growth?

Based on research undertaken by Social Research, Inc., for the Planned Parenthood Federation of America, this remarkable, original study—

FAMILY DESIGN: Marital Sexuality, Family Size and Contraception,
by Lee Rainwater, Professor of Sociology, Washington University (St. Louis), and author of
And the Poor Get Children

—illuminates these many questions with a detailed, revealing analysis of intensive interviews with husbands and wives of all social classes and subcultures, exposing the patterns that underlie American family design.

Clearly written and highly readable . . .

FAMILY DESIGN is the first empirical study of family planning applying the framework of family sociology to a problem previously studied largely from a demographic viewpoint. The discussion and interviews regarding sexual and family relationships were astonishingly uninhibited, and very enlightening.

FAMILY DESIGN reveals a close correlation of the quality of sexual satisfaction and the type of conjugal role relationship to the degree of success in the use of contraceptives. This discovery constitutes an important contribution to family sociology, and to our knowledge of the social and demographic implications of family design. The interviews, wherever pertinent, are quoted at length and provide realistic background for the discussion of findings.

EDUCATION FOR MARRIAGE

BY JAMES A. PETERSON

Chairman of the Sociology Department and
Marriage Counselor of the University of Southern California

Widely acclaimed for its insight and clarity, this text (now in its second edition) helps the student to develop a sound approach to marriage choice and to the necessary adjustments in the various phases of marriage and family life. The author makes clear the importance of the rapid shifts in functions, roles, and values, and the impact of these trends on modern marriage. Stressing increased awareness of these developments and the necessity for personal growth, the text guides the student in a step-by-step preparation for the achievement and maintenance of a cohesive marital relationship. With figures, tables, and half-tones. 1964. xvii, 526 pages. Cloth. \$6.95.

AMERICAN WOMEN:

THE REPORT OF THE PRESIDENT'S COMMISSION ON THE STATUS OF WOMEN AND OTHER PUBLICATIONS OF THE COMMISSION

Edited by Margaret Mead and Frances Balgley Kaplan

In addition to the full Report and the findings of the subcommittees, the text contains a perceptive Introduction and an Epilogue evaluating the Report by Margaret Mead, who supervised the preparation of this edition, 1965. 256 pages. Paper. \$2.95.

**SOURCEBOOK IN
MARRIAGE AND
THE FAMILY**

Second Edition

Edited by Marvin B. Sussman

This revised edition contains 49 new articles (for a total of 75) and retains the fine features of the first edition, including strong emphasis on methods of studying the family, a selection from the best interpretive essays on the sociology of the family, and the "family-life-cycle" plan of organization.

Paperbound 1963

566 pages

**THE FAMILY, SOCIETY,
AND THE INDIVIDUAL**

Second Edition

William M. Kephart

The second edition of this standard text continues to use the family to illustrate the relationship between—and interdependence of—individual needs and societal imperatives. The entire book has been thoroughly revised, and completely new chapters or sections have been included on Social Class, Mate Selection, and Marital Adjustment. Dr. Kephart maintains the unique blending of scholarship and writing skill that made the first edition so popular with students and instructors across the country. A revised Instructor's Manual will be available with the text.

**COMPARATIVE FAMILY
SYSTEMS**

Edited by M. F. Nimkoff

An introduction to the major variations in the organization of the human family; what they are, what causes them, and what differences they make. Twelve different authorities examine family life in societies with various political, economic, religious, marital and descent patterns. Dr. Nimkoff supplies supporting introductory and concluding analyses. A comprehensive annotated bibliography is appended.
