WHAT IS THE NCFR?

NCFR was founded in 1938 as an interprofessional forum through which members of those disciplines interested in family life might think, work, and plan together for the strengthening of marriage and family life. Its objectives are to provide opportunities for individuals, organized groups, and agencies interested in family research, counseling and education to plan and act together on matters relevant to marriage and family living, including establishment of professional standards, promotion and coordination of educational efforts, encouragement of research, and extension of community services for families.

THE FAMILY, SOCIETY, AND THE INDIVIDUAL HAVE BEEN COMPLETELY REVISED.

William M. Kephart will publish in November a revision of his definitive textbook, **The Family, Society, and the Individual**. "Times and emphases change," says Kephart, "— and the focus of research tends to reflect this change. And since college texts are based largely on the distillation of research, they too— if they are to maintain their vigor— must change."

And the changes in the new edition are many. Watch for the Third Edition in November, and you will see that **The Family, Society, and the Individual** has indeed been completely revised.

FAMILY DEVELOPMENT

Evelyn Millis Duvall

This study of the dynamics of family interaction has been radically revised. While the basic structure of the book—*the family life cycle*—remains unchanged, most of the content has been rewritten and two new chapters have been added. New sections include material on critical stages in child development, intergenerational interaction, predictable vulnerabilities, and other topics. The *developmental task concept* is applied, as in earlier editions, to each stage of the family life cycle, but is supported by the addition of much new data.

THE SOCIAL CONTEXT OF MARRIAGE

J. Richard Udry

The author has thoroughly revised this study of the social-psychological aspects of heterosexual interaction in courtship and marriage. Much new material has been added and the book has been entirely reset. The chapters on *sexual interaction in marriage* and *fertility control* have been completely rewritten, and there is new material on premarital sexual behavior, establishment of sex roles, legal changes toward equality of the sexes, changing legal grounds for divorce, and other topics.

MARRIAGE and the FAMILY

Harold T. Christensen and Kathryn P. Johnsen,
both Purdue University

Ready this Fall! This functional textbook gives the student a practical understanding of the social and psychological factors that influence his own interpersonal relationships and of the kind of marriage and family life he may be able to establish. Recognizing the importance of values and value conflicts in male-female, husband-wife, and parent-child relationships, it develops a principle of "value relevance" and uses it throughout as a tool for understanding the different consequences stemming from specific behavior patterns. While firmly grounded in both theory and empirical research findings, the book is so written that these can be directly translated into personal experience.

JUVENILE DELINQUENCY

Robert G. Caldwell, University of Iowa
James A. Black, University of Tennessee

Providing a broad survey of the field, this new textbook examines the nature and scope of juvenile delinquency, its causes, and the methods and procedures devised for its prevention and control. The approach is interdisciplinary, drawing upon the empirical findings of many fields, including biology, anthropology, sociology, psychiatry, medicine and the law. The authors review the pertinent theoretical positions, discussing their strengths and weaknesses, and arriving at such conclusions as are justified in the light of existing knowledge. Particular emphasis is given to assessing the effectiveness of correctional programs and the major agencies of delinquency prevention and control.

Lower-Class Families

THE CULTURE OF POVERTY IN NEGRO TRINIDAD

By **HYMAN RODMAN**, *Senior Research Associate, Merrill-Palmer Institute, Detroit.*

This volume presents one of the most detailed descriptions available of lower-class family life within a community. Although primarily an ethnographic study of family organization in a Negro village in Trinidad, the book also offers a theoretical statement on the relationship between lower-class status and family structure.

Occupation: Housewife

By **HELENA Z. LOPATA**, *Chairman, Sociology Department, Loyola University.*

Based on a broad statistical study in the metropolitan Chicago area, this volume focuses on the ways in which women conceptualize the social roles they perform. Professor Lopata finds that while a large percentage of housewives devalue most social roles outside the home, it is nevertheless true that modern women are becoming increasingly creative and competent both as housewives and as participants in American society.

TWO IMPORTANT NEW BOOKS ON THE FAMILY FROM MARKHAM

THE AMERICAN FAMILY: A Sociological Interpretation

by **BERT N. ADAMS** University of Wisconsin

This text is unique in the presentation of analytic frameworks and theoretical conceptions for organizing and interpreting the great mass of information now available on the U.S. family. While the book is an introductory text covering all the standard topics such as socialization, dating and mate selection, marital roles, kinship, divorce, etc.; it also makes a strong theoretical contribution to the family field.

"Readers of The American Family: A Sociological Interpretation by Bert N. Adams are in for an exciting experience. The family is placed within an historical and cross-cultural context to start with, and then major aspects of the contemporary American system are treated, with a view toward rational understanding. The author presents his material within the sociological framework and he is analytical more than descriptive, emphasizing theoretical concerns to aid in interpretation. The book is based on the premise that learning is more than memorizing, and so challenges its readers to think for themselves and to struggle creatively with the controversial issues and unresolved problems facing the family institution.

The author has been selective more than encyclopedic, trying to avoid the trivial and the mediocre and to stimulate readers beyond the mere digestion of summary materials usually found in textbooks. The reader may not always agree with everything he encounters but he will be challenged to analyze, which is the essence of learning."

READINGS ON THE SOCIOLOGY OF THE FAMILY

edited by **BERT N. ADAMS** University of Wisconsin

and **THOMAS WEIRATH** Wisconsin State University at Whitewater

This reader attempts to acquaint the student with some major aspects of the family placed in an analytical framework. The 39 readings are organized around the life-cycle approach to study of the family. The articles selected strongly emphasize the American family system. Since many students feel they already know the family system of our society, this emphasis should capture the student's attention. The articles selected were chosen to acquaint the student with the main issues of the family, while at the same time stimulating his thought processes. In addition, the introduction to each major section is written to raise questions about the articles the student will read.

PARENTS in MODERN AMERICA

by E. E. LeMasters
University of Wisconsin

Unusual in that it focuses on the role of the parents rather than the child, this book offers a sociological approach to the parenthood role and parents' attempts to perform in the social system. Concepts such as role, social class, and social change are used extensively in this analysis. This valuable supplementary text is also unique in that it analyzes socio-economic factors affecting parents and gives attention to the American father who has been ignored in much of the literature on parents.

Rethinking Marriage, Sexuality, Child Rearing, and Family Organization

Arlene Skolnick

Jerome H. Skolnick

both at the University of California at Berkeley

Here is a book that challenges academic and popular assumptions about the family, sex, and society — past, present, and future. Writing and editing from a perspective that is both scholarly and controversial, the authors provide a lengthy introduction to readings criticizing traditional and deterministic views of the contemporary nuclear family. This reader provides a novel framework for viewing the family as a social problem and is organized around four key topics: the family idea, the politics of sex and marriage, the politics of childbearing, and the politics of family and household organization. The readings are interdisciplinary and are drawn from history and biology as well as from sociology, psychology, and anthropology.
